

It has come to my attention that the FCC is considering transitioning K-Love Radio station (102.7; 101.9; and 90.1) to a LPFM station. I am very much opposed to this move. K-Love is listened to by many, many people, including young and old. There is no other station in our area like K-Love. I want to know that my children and grand-children have the option to listen to a station that has modern Christian music, and POSITIVE news stories. I want to know that we can listen to a station that plays this music and where the DJ's don't talk about the smut and sexual innuendos that I have been shocked to hear on other popular stations. Please reconsider and do not move K-Love to a Low Power FM service. Thank you for your consideration.
